

DRG4 FOOD

Boosting Trust, Transparency, and Responsibility in the Food System through Digital Solutions

About the project

Fostering trust in the food system by implementing data-driven solutions in personalized nutrition, food traceability, and consumer food choices.

It brings together researchers, startups, and SMEs to develop and pilot these innovative approaches.

pilot projects

How?

There will be two open calls, providing a combined funding of €1.9 million. They are specifically focused on piloting innovative data-driven digital solutions in the food sector, with a strong emphasis on ensuring trustworthiness as the default standard.

What's in it for you?

1. Selected pilots will receive up to €300k in funding.
2. Have the chance to engage in a 9-12 month immersive coaching program during the development phase.

When?

OCTOBER 2023

APRIL 2024

How to apply?
